Objective

I am seeking a position within an organization in User Experience (UX) and User Interface Design (UI). I will also convert my UI Design into pixel perfect Responsive HTML5/CSS3.

I am able to work effectively in a team. I enjoy a challenge and look for the opportunity to expand and develop my skill set. My aim is to create better interfaces and experiences for the user, making the web, application's and technology easier for the user. I would like to work together with web design firms and do my best for the best result. What does matter is the output of my work, which is always focused at the point.

I am a fast learner and I just need one opportunity to show my skills. Although my faculty is different, it doesn't matter. The only thing that matter is skill. If you have skills than your faculty doesn't matter. Hope I will heard a positive response from you.

Skills

- HTML 5
- CSS 3
- CSS Frameworks / Bootstrap
- CSS Grid / Flex box
- CSS Preprocessor / SASS
- JavaScript / jQuery
- Adobe Photoshop
- WordPress
